# RECALL and LEARN

Can you recall each of these symbols?  
What do they mean?

Can you explain how they are used in a  
sentence?

A **compound sentence** is two sentences joined by a FANBOYS conjunction.

It is made up of two main clauses

Examples:

It was raining inside so we had playtime inside.

I was tired but I couldn't sleep.

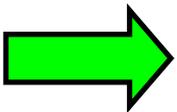

## READ and RESPOND

Bees drink nectar from flowers using their long tongue. Their tongue is nearly twice as long as their body and it is called the proboscis. This helps them reach the nectar inside the flower so they can extract the nectar they desire. Bees store the nectar in a special sac called a Honey Stomach but it is different to the stomach we have as humans. Inside the stomach the nectar is broken down into two sugars. Special enzymes are used for they help change the nectar into two sugars called *fructose* and *glucose*. The bee returns to the hive where it spits the nectar from its Honey Stomach into one of the cells. The heat in the hive helps water evaporate from the nectar and it turns into honey. The bees then cover the cell with a wax cap.

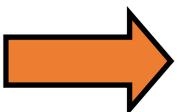

Can you find all the compound sentences?

Write them in your book then CHECK them using the definition in the 'Recall and Learn' section.

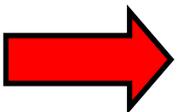

## CREATE and REFLECT

Use the coordinating conjunction so to create a compound sentence

Use the coordinating conjunction but to create a compound sentence

Use the coordinating conjunction for to create a compound sentence

# RECALL and LEARN

Can you recall each of these symbols?  
What do they mean?

Can you explain how they are used in a  
sentence?

Determiners go together with nouns and expanded noun phrases. They go in front of a noun or a noun phrase to help you identify how many nouns there are. They may alternatively tell you which person or object is being referred to.

Examples:

a, an, the, that, this, those, my, you, his, her, its...

I would like **that** apple.  
I would like many bananas.
